

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-9 (Canceled).

Claim 10 (New): A mobile telephone with a camera, wherein a shutter of the camera is automatically operated when the mobile telephone with the camera is in a camera mode and recognizes a preliminarily registered voice.

Claim 11 (New): The mobile telephone with a camera, as claimed in claim 10, wherein the mobile telephone with a camera comprises a camera control unit, a voice recognition unit for recognizing voice from a transmitter, a preliminarily registered voice sample, and a voice comparison unit for comparing an output of the voice recognition unit with one of the preliminarily registered voice samples,

wherein, when the mobile telephone with the camera is in the camera mode, the voice comparison unit detects a coincidence of the output of the voice recognition unit and the voice sample and outputs a signal for operating the shutter of the camera to the camera control unit.

Claim 12 (New): A mobile telephone with a camera, wherein a shutter of the camera is automatically operated when the mobile telephone with the camera is in a camera mode and recognizes a preliminarily registered pose of a subject through the camera.

Claim 13 (New): The mobile telephone with a camera as claimed in claim 12, wherein the mobile telephone with a camera comprises a camera control unit, an image recognition unit for recognizing an image to be shot by the camera, a preliminarily registered

image sample, and an image comparison unit for comparing an output of the image recognition unit with one of preliminarily registered image samples,

wherein, when the mobile telephone with the camera is in the camera mode, the image comparison unit detects a coincidence of the output of the image recognition unit and the image sample and outputs a signal for operating a shutter of the camera to the camera control unit.

Claim 14 (New): A mobile telephone with a camera, wherein a shutter of the camera is automatically operated when the mobile telephone with the camera is in a camera mode and recognizes a preliminarily registered movement of a subject through the camera.

Claim 15 (New): A mobile telephone with a camera as claimed in claim 14, wherein the mobile telephone with a camera comprises a camera control unit, an image recognition unit for recognizing an image to be shot by the camera, a preliminarily registered image sample, and an image comparison unit for comparing an output of the image recognition unit with continuous two image samples of the preliminarily registered image samples,

wherein, when the mobile telephone with the camera is in the camera mode, the image comparison unit detects a coincidence of the output of the image recognition unit and the continuous image samples and outputs a signal for operating a shutter of the camera to the camera control unit.

Claim 16 (New): The mobile telephone with a camera, as claimed in claim 11, wherein the mobile telephone includes a receiver for notifying a shooting person of a successful operation of the shutter of the camera.

Claim 17 (New): The mobile telephone with a camera, as claimed in claim 13, wherein the mobile telephone includes a receiver for notifying a shooting person of a successful operation of the shutter of the camera.

Claim 18 (New): The mobile telephone with a camera, as claimed in claim 15, wherein the mobile telephone includes a receiver for notifying a shooting person of a successful operation of the shutter of the camera.

Claim 19 (New): The mobile telephone with a camera, as claimed in claim 11, wherein the mobile telephone with a camera further comprises a receiver for notifying a shooting person of an unsuccessful operation of the shutter of the camera.

Claim 20 (New): The mobile telephone with a camera, as claimed in claim 13, wherein the mobile telephone with a camera further comprises a receiver for notifying a shooting person of an unsuccessful operation of the shutter of the camera.

Claim 21 (New): The mobile telephone with a camera, as claimed in claim 15, wherein the mobile telephone with a camera further comprises a receiver for notifying a shooting person of an unsuccessful operation of the shutter of the camera.

Claim 22 (New): The mobile telephone with a camera, as claimed in claim 11, wherein voice taken in from a transmitter unit can be registered as the voice sample.

Claim 23 (New): The mobile telephone with a camera, as claimed in claim 13, wherein image taken in from the camera can be registered as the image sample.
